

The Air Cannon. Double the Confetti, Double the Fun!

The Air Cannon has a double-barrel configuration with an internal air supply tank. It uses 125 PSI / 9 Bar and holds 1.5 lbs / 0.75 kgs of Pro Fetti or two and a half streamer sleeves. The Air Cannon will launch Pro Fetti up to 50 ft / 15 m and streamers up to 80 ft / 24 m!

A combination of CO² and the rear air intake ensures quiet operation. CO² hoses are available in lengths starting at 10 ft / 3 m up to 50 ft / 15 m . The powder coated stainless steel chassis provides durability and includes adjustable double barrels 4 in / 10 cm in diameter.

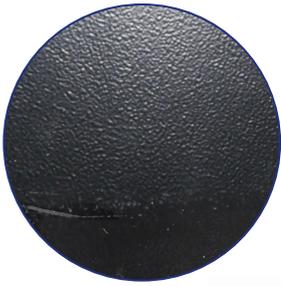

The Air Cannon uses up to two and a half streamer sleeves per shot. Streamers are available in various colors and sizes. When launched, the streamers uncoil, creating a multicolored “cascading waterfall” effect (purple and yellow shown).
