

# The Cyclofetti. Unique Design, With Massive Power!

The Cyclofetti propels up to 5 to 7 lbs / 2 to 3 kgs of Pro Fetti per shot, creating that WOW factor! With the adjustable bracket, this unit can be positioned in the lighting rig, on the stage floor, or anywhere your production requires Pro Fetti.

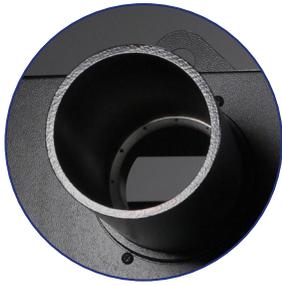

A Combination of CO<sup>2</sup> and the rear air intake ensures quiet operation. CO<sup>2</sup> hoses are available in lengths starting at 10' / 3 m, up to 50' / 15 m. The powder coated stainless steel chassis provides durability and includes a lightweight lid providing easy access access to the load hopper.

*Pro Fetti is produced in various sizes, colors and shapes out of either paper tissue, metallic PVC or iridescent film. When launched, Pro Fetti spins and rotates slowly, creating an impressive "cascading waterfall" effect (Metallic PVC Pro Fetti shown).*
